I'm a motivated software engineer who loves learning new things and not afraid to go out of the comfort zone. I'm eager to take responsibility and work in challenging and interesting projects. I'm looking to collaborate with a team of innovative professionals who are dedicated to their craft.

Work Experience

- Logo Yazilim** **Ankara, Turkey**
Software Engineer *Nov 2019 – Present*
Logo Yazilim is Turkey's largest public software company that provides business application development, integration, and HR solutions.
Participating in the development of Logo J-Platform which is an enterprise resource planning software for large businesses.
Agile development methodology is used for the development of the project. Java programming language is used for server-side programming, the presentation layer is developed using Vaadin.
Technologies: Java, Spring, Vaadin, Jenkins, Ant, Ivy, Git, Mssql
- Med.tn** **Tunis, Tunisia**
Software Engineer *Jun 2019 – Sep 2019*
Med.tn is the most expansive medical platform bridging the gap in access to health services across Tunisia and 7 other countries.
Working with the enterprise, I developed a user interface module to be used virtually by patients to consult doctors. It was a collaborative effort with doctors and patients to create an interactive form that allows patients to choose their symptoms, making diagnosis much simpler for medical experts/doctors.
Additionally, I was involved in developing a telemedicine system that specialized in burn injury treatment and included a virtual meeting component. It provides a visual of a burnt patient including the parts and percentage of burn of the human body for easy reporting and diagnosis.
Technologies: Java, Spring, Javascript, JQuery, Php, Codeigniter, CSS, Mysql
- Uet System** **Ankara, Turkey**
Software Engineer *Sep 2018 – May 2019*
Worked on top-down architecture and backend development for several projects.
Participating in the development of inventory management software for Turkseker which is the biggest sugar company in Turkey.
Technologies: Java, Spring, Swing, Javascript, JQuery, Php, CSS, Mysql

Education

- Sakarya University**
Computer Engineering (GPA: 3.25 / 4.00) *2014–2018*

Skills

- Languages & Technologies:** Java, Spring, Vaadin, JavaScript, JQuery, CSS, SQL, MySQL, Linux, Docker, Git, Ivy, Maven, JUnit, Mockito
